### Maintaining Your Window Film:

Clean film with a soft cloth. Never use alcohol or ammonia products. A vinegar based window cleaner is recommended to maintain your window film. Expect bubbling to occur immediately after your installation. Do not touch the film or roll your windows down for three (3) days after the installation of your window film. If you attempt to fix any problem you see prior to bringing it to the attention of your window film professional you may void your warranty.

### Vehicle Limited Warranty Coverage:

This warranty is limited to replacing any defective film due to fading, distorting, cracking, peeling, delaminating or demetallization for as long as the original customer owns the vehicle. Warranty is valid for installations that conform to state or provincial laws. FlexFilm™ is not responsible for any damages incurred by the use of an illegal window film installation. Warranty is non-transferable.
